Goalserve Golf API Pricing and Data Feed Overview

In the evolving world of sports technology, access to accurate and real-time golf data is essential for developers, betting platforms, fantasy sports operators, and sports media companies. Goalserve provides a comprehensive Golf API designed to deliver live scoring, tournament coverage, player statistics, and historical data in structured formats suitable for modern applications.

This document provides an overview of **Goalserve's Golf API** coverage, features, and pricing structure.

Overview of Goalserve Golf API

Goalserve's Golf Data Feed API delivers:

- Live PGA leaderboard updates
- Player statistics and rankings
- Player profiles
- Tournament schedules
- Historical season data (since 2010)
- Hole-by-hole scoring
- Fantasy statistics data
- Bookmaker pregame and in-play odds

Data is available in **XML and JSON formats**, allowing seamless integration into websites, mobile apps, betting platforms, and enterprise systems

Tournament and Series Coverage

The Golf API covers major professional tours and global events, including:

- PGA Tour
- Masters
- LPGA
- European Tour
- Asian Tour
- Japan PGA
- Web.com Tour

- Champions Tour

This wide coverage ensures global applicability for sports platforms targeting diverse audiences.

Subscription Plans and Pricing

Goalserve offers flexible subscription options tailored to different usage needs.

1 Month Subscription

- Price: $200
- Access to live PGA leaderboard
- Player stats and profiles
- Rankings
- Tournament schedules
- Past season statistics

This option is suitable for short-term projects, pilot integrations, or seasonal coverage

6 Months Subscription

- Price: $1000
- Includes all features available in the 1-month plan
- Cost savings compared to monthly billing

This mid-term plan is ideal for platforms requiring consistent tournament coverage over multiple seasons

12 Months Subscription

- Price: $1500
- Full Golf package access
- Long-term cost efficiency

The annual plan is commonly selected by enterprises and sports platforms seeking stable, uninterrupted data access throughout the year

Extended Package Options

In addition to the standalone Golf package, **Goalserve** offers:

US Sports Package

- NFL/NCAA live data
- NBA/NCAA live data
- MLB live data

- NHL live data

Full Package (All Sports)

- Complete access to all available feeds
- In-play live odds API for all sports
- Live match tracker and ball position API

These packages are designed for multi-sport platforms and large-scale sportsbook operations.

Technical Infrastructure and Reliability

Goalserve supports:

- XML and JSON delivery formats
- 24/7 customer support
- 99% uptime guarantee
- Three independent data centers
- Coverage of 20+ sports

The company reports over 200 active sports data subscribers worldwide and more than 20 years of industry presence

Use Cases for Golf API Integration

Goalserve Golf Data Feed can be used for:

- Live score applications
- Fantasy sports platforms
- Sports analytics dashboards
- Sports betting websites
- Media and broadcasting platforms
- Historical performance analysis systems

Its structured, real-time data delivery makes it suitable for both consumer-facing applications and enterprise-grade platforms.

Conclusion

Goalserve's Golf API offers structured access to real-time leaderboards, player statistics, tournament schedules, and historical golf data through flexible subscription plans. With coverage of major tours worldwide and multi-format data delivery, it provides scalable solutions for sports technology platforms seeking reliable golf data integration.

For businesses requiring accurate, live, and historical golf information, Goalserve's subscription-based pricing model offers options ranging from short-term access to annual enterprise coverage.
